

Pathology Pictorial Documentation for iKnife-Navigation Breast Cases

Version 2, March 2022

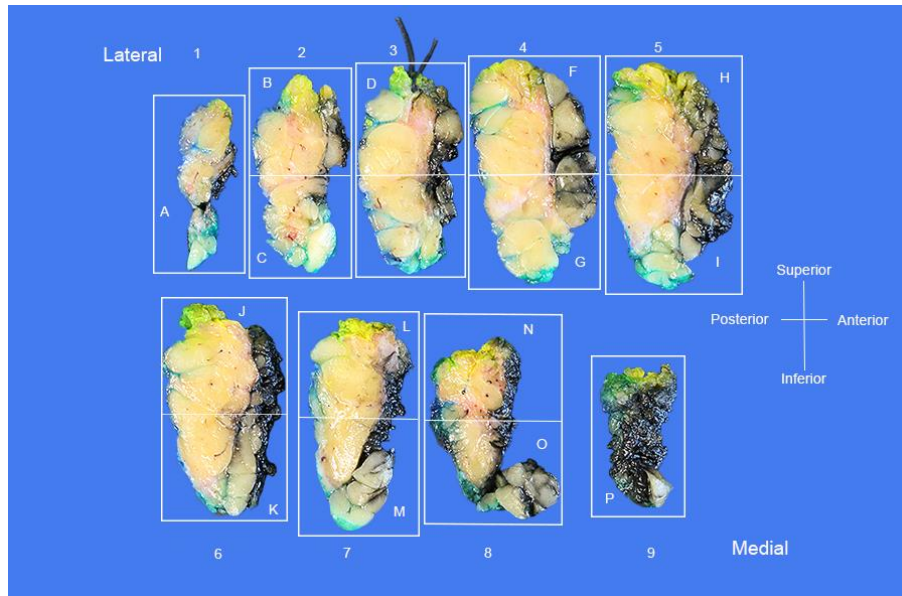

- 1- In the OR, add a note/sticker to the pink and/or yellow copy of the requisition form before sending the specimen to pathology “iKnife case. Please photograph the specimen”.
- 2- Optical imaging (photography) of the specimen before inking. Please orient the tissue the same way as it is going to be sliced. Please make the suture marks visible.

- 3- Optical imaging (photography) of the specimen after inking, before slicing. Please orient the tissue the same way as it is going to be sliced.

- 4- Optical imaging (photography) of the specimen after slicing. Please include a scale in the imaging scene for measurement.

- 5- X-ray imaging of the slices. After image acquisition and annotation is done, please export in 3 forms:

- Export as JPEG file WITH annotations
- Export as JPEG file WITHOUT annotations
